

## HUMANITIES AND SOCIAL SCIENCES

### Objectives

To prepare psychologists who are committed to seeking the knowledge, techniques, abilities, and skills that will promote the complete development of the person as an individual and as part of an organization or group, in order to provide counseling, and evaluate and propose solutions to improve the mental health of our society, as well as to develop the basic abilities and skills needed to practice psychology efficiently.

### Areas for Potential Employment

In this program, internships are a vital part of the students' preparation, as graduates will be able to apply their knowledge in the Program for Community Medicine; at the Psychological Clinic, hospitals, companies, and schools. Graduates of this program will be able to work professionally for public and private mental-health institutions such as DIF (the government department dedicated to family services), IMSS (the Mexican Institute of Social Security), ISSSTE (the Institute of Social Security and Services for Workers of the State), social rehabilitation centers, independent groups or associations, schools (at all levels), day-care centers, and macro and micro businesses.
