Course Description

Students develop an understanding of the strategic use of information technology from a business perspective at the enterprise level. They are expected to understand the internal management of information systems services from the point of view of the CIO and to examine alternative strategies and tactics available to management to achieve goals. Working students and students with post-baccalaureate experience will be able to examine the current and potential impact of information and information technology on all aspects of their position, firm, and industry. Students will be able to understand the strategic information thrust of potential employers.

Prerequisites

None
