Engineering	Upper Division	English

Course Description

The lecturer and the students select a general topic in Applied Mathematics that has been researched extensively. Then the lecturer finds refereed journal papers on that topic and distributes them to the students enrolled in the course. Each student should give a talk about a paper that s/he selects. The talk should last 25-30 minutes and the rest of the period will be devoted to the discussion of the paper. These talks are open to all faculty and students of the department.
