Social Sciences	Lower Division	English

Course Description

Course integrates and consolidates theories from prerequisite social behavioral and biological science courses from a human growth and developmental perspective. Social Work Methods & Practices I/ Micro Systems (Case Social Work II) aims to provide a thorough knowledge on the last two stages of this method, planning, intervention and review. Students attending this module will learn about various models (i.e. crisis intervention) of intervention with special emphasis to the Psychodynamic Approach that is applicable across a wide range of settings, problems and different size systems. Presentation of case studies is material for discussion and critical analysis.

Prerequisites

SOWK-220

Topic Areas

1. Psychodynamic approach
2. Task centered approach
3. Working in a multi-disciplinary team
4. Role-playing
